

Slides (M1)

These slides represent the VOW agentic workflow in a sequential manner. this only covers the design of how the page will look like and render different data points for M1 (till strategy plan stage). This covers Basic details, Ctv inventory and targeting. Rest of the screen will cover in M2.

Note: Don't focus on the rendered data.

Describe the campaign you want to plan...

PDF, DOCX, XLSX, CSV or PPTX

VOW Agent can make mistakes. Review important campaign details.

1 · History

Icon changed from the chevron to a history mark, since it no longer expands the rail. Toggles the flyout; scrim click or X closes it.

2 · New chat

Clears the workspace back to the empty Start planning state. Current chat stays in history.

3 · Campaigns (proposed)

History lists conversations; this lists the campaigns those chats produced, by status — draft, accepted, live. It answers "where is that plan I approved" without scrolling chat titles.

[Accept Plan](#)

→ RATE CARD (instead of deals for M1 as per the updated plan.)

4b Inventory and split inline in the thread Publishers and creative durations picked in a table; the allocation lands underneath.

Mega Toothpaste 2023 — Prime Video DRAFT

Inventory picked - splitting budget

PUBLISHER	CREATIVE	CPM
✓ Amazon — Prime Video	30s	£26.40
✓ Netflix	15s	£31.80
✓ ITVX	20s	£18.20

Split the £48k across them — weight it towards reach.

Here's the allocation. Switch preset and the table recalculates — budget, impressions and blended CPM all follow.

INVENTORY	SHARE	BUDGET	IMPRESSIONS
Amazon — Prime Video	45%	£21,600	0.76M
Netflix	25%	£12,000	0.35M
ITVX	30%	£14,400	0.74M
Total	100%	£48,000	1.86M

Blended CPM £25.85

Now the creatives. Duration changes the rate — shorter spots clear cheaper. Pick the durations you'll run and I'll split each publisher's budget evenly across them.

Ask for a different split — "cap Netflix at £12k"...
